

Simulated MFI Distribution for HSV-1

Simulated MFI Distribution for CMV

CMV\_PP150 : Precision (Mean Standard Error) in Seropositivity (Beta) Estimation

Lower SE indicates higher precision. Faceted by the other SNP effect.

# CMV\_PP150 : Bias in Seropositivity (Beta) Estimation

Faceted by SNP effect on IgG Level (gamma)

CMV\_PP150 : Precision (Mean Standard Error) in IgG Level (Gamma) Estimation

Lower SE indicates higher precision. Faceted by the other SNP effect.

CMV\_PP150 : Bias in IgG Level (Gamma) Estimation

Faceted by SNP effect on Seropositivity (beta)

HSV1 : Precision (Mean Standard Error) in Seropositivity (Beta) Estimation

Lower SE indicates higher precision. Faceted by the other SNP effect.

# HSV1 : Bias in Seropositivity (Beta) Estimation

Faceted by SNP effect on IgG Level (gamma)

HSV1 : Precision (Mean Standard Error) in IgG Level (Gamma) Estimation

Lower SE indicates higher precision. Faceted by the other SNP effect.

# HSV1 : Bias in IgG Level (Gamma) Estimation

Faceted by SNP effect on Seropositivity (beta)

# HSV1\_OVERLAP : Precision (Mean Standard Error) in Seropositivity (Beta) Estimation

Lower SE indicates higher precision. Faceted by the other SNP effect.

# HSV1\_OVERLAP : Bias in Seropositivity (Beta) Estimation

Faceted by SNP effect on IgG Level (gamma)

# HSV1\_OVERLAP : Precision (Mean Standard Error) in IgG Level (Gamma) Estimation

Lower SE indicates higher precision. Faceted by the other SNP effect.

HSV1\_OVERLAP : Bias in IgG Level (Gamma) Estimation

Faceted by SNP effect on Seropositivity (beta)
